SENSORY GUIDE

Every ride and attraction at Crealy offers a different experience, with varying levels of noise, lighting, movement and other sensory elements. These factors may affect the suitability of certain attractions for guests with sensory sensitivities, including those with autism, ADHD or sensory processing differences.

We understand that every guest has different sensory preferences and requirements. Our Sensory Guide has been designed to help you understand what to expect from each ride and attraction, and where certain sensory elements may be present.

The guide provides an indication of what you may experience, allowing you to make informed choices about the attractions that are right for you.

GOOD TO KNOW

We understand that theme parks can sometimes feel overwhelming, with lots of noise, excitement and activity happening around you.

If you need a little break from the hustle and bustle, Crealy has some lovely quieter areas where you can take some time out and enjoy a change of pace.

Why not explore our beautiful lakeside walks, where you'll find peaceful surroundings, a river crossing, treehouses and even some animals along the way? It's a lovely part of the park that many guests don't realise is there!

UNDERSTANDING THE GUIDE
